VOL. XXXI. No. 36.

DIDSBURY, ALBERTA, THURSDAY, SEPTEMBER 6, 1934

\$2.00 per year. 5 cents a copy.

## Community Hall School Fair, Sept. 8

The Community Hall School Fair will be held this year on September 8 (Saturday) in Community Hall east of town. This fair has been successfully operated for a number of years.

Five school districts, Rosebud, Grand Centre, Mona, Neapolis and Jutland, have united in the fair this year.

The schoolchildren have always taken great interest in the affair, previous years seeing a large number of splendid exhibits. This year, it is expected will be no exception, and even a larger number of exhibits is looked for.

Over \$200 in prize money will be awarded, made possible by a contribution of \$20.00 from each school district participating in the fair.

A good program of sports for the children has been arranged for the afternoon.

An admission fee of 25 cents will be charged.

## Has Eye Injured by Shattered Windshield

While returning from Red Deer on Sunday Mr. E. Buhr, manager of the Buhr Elevator, had the misfortune to have his eye injured when a flying stone struck his windshield and splinters of glass entered his eye.

The accident necessitated Mr. Buhr's removal to the Calgary Holy Cross Hospital.

## School Opened Tuesday

The local schools opened Tuesday with the staffs in both schools as follows:

High: Mr. Elmer Evans, Principal; Miss Iva Rupp and Mr. A. Reiber, Assistants.  
Public: Mr. C. R. Ford, Principal; Miss Winnie Studer, Miss Ruth Jossmer and Mr. Harley Traub, Assistants.

Teachers at the various rural schools have been appointed as follows:

East  
Burnside: Mr. A. Arlenson  
Gore: Miss Nelda Hugst  
Grand Centre: Miss K. Pitt  
Jutland: Mr. S. Gibson  
Mona: Miss D. Brown  
Neapolis: Mr. John Gulliver  
Rosebud: Miss Alice Pearson  
West  
Clovermount: Miss M. Pearson  
Dowd: Miss D. Youngs  
Elkton: Miss E. Mann  
Inverness: Miss M. Bradley  
Melvin: Miss Hazel Ray  
Rugby: Miss Smith  
Springdale: Miss Weiss  
Waterloo: Miss McEwen  
Westcott: Miss Lugham  
Westdale: Miss M. Levagood  
Zella: Miss Carter

## Postponed

The September meeting of St. Cyprian's W. A. which was to have been held at the home of Mrs. Durrer tomorrow afternoon (Friday) has been postponed until next Friday afternoon, September 13th.

## Kentucky Horses Imported to Didsbury

New blood has been added to the stable of purchased saddle horses owned by W. J. Fulkerth who returned on Saturday from Larchland, Ill.

Mr. Fulkerth attended a number of state fairs while in the south and was successful in purchasing a three-year-old filly sired by "Stone-oval King," three times champion at the Missouri State Fair. He also bought a four-month-old colt sired by "Fashion Plume," another great show horse.

Both filly and colt are full-blooded Kentucky saddlehorses. "Fashion Plume" is a grandson of "Bourbon King," undefeated world's champion. The colt's mother is a grand daughter of "Rex Macdonald," claimed to be the world's greatest show horse and sire.

## President Morgan Leaves for East

H. W. Morgan, president of the Dominion Postmasters' Association, left Saturday for Ottawa where, in conjunction with other members of the executive, a conference will be held with the Postmaster-General and postal authorities pertaining to matters of interest to postmasters.

Mr. Morgan will travel via Chicago where he will stop over for a day to visit an uncle at that point. He will return by boat via Toronto and Windsor.

## United Grain Growers Announce Dividend

Announcement is made by United Grain Growers Ltd., of the payment of a dividend of four per cent, or one dollar per share on the paid up capital of United Grain Growers Ltd., for the fiscal year ending July 31st. In announcing the dividend Mr. R. S. Law, president of the company stated that payment is made from the earnings of the company after making provision for bond interest and full depreciation, and a satisfactory addition to surplus account. Attention was called to the fact that the shareholders have received, during the life of the company, by way of dividends, an amount greatly in excess of the paid up capital of United Grain Growers Ltd. Cheques for the dividend just declared are to be mailed to shareholders on September 15th.

## "Hospital Aid" Meeting.

Will all members please take notice that a meeting of the "Hospital Aid" will be held on Tuesday, September 11 at 8 o'clock in the afternoon at the Knox United Church parlour.

All ladies are cordially invited to attend.

## Sylvan Lake Orchestra Will Play Here Friday

The popular "Silverstone Seven," Sylvan Lake's premier dance orchestra this season, will appear at the Didsbury Opera House tomorrow evening (Friday).

This is a real talented Al orchestra and local dance fans are assured of a splendid evening's enjoyment dancing to their melodious, haunting strains.

## Fish & Game Assn. Annual Convention

The annual convention of Alberta's fish and game associations will be held this year at High River, according to information received from the headquarters of the Alberta Fish and Game Association at Edmonton.

## Province Saves On Interest

Reduction by the Dominion Government of the interest rate on provincial borrowings in the last three years, from five to four and one-half per cent, will be passed on to the municipalities, whose treasury notes the province holds, according to Hon. J. R. Love, provincial treasurer. The reduction by the Dominion is applicable to about \$10,000,000 borrowed by the province for relief works and direct relief and included in this amount is about \$1,400,000 which the province loaned to the cities of Edmonton and Calgary. The reduction is effective as from July 1 last. Savings to the Provincial Treasury will also be considered.

## To Stimulate Objective Thinking

The top-survey condition in which the world finds itself to-day, naturally leads to serious thought on the part of everyone. Why should there be so much penny and want in the midst of a surplus of commodities? What are the real causes of stagnation of trade the world over. One hears that the capitalist system is doomed, and out of the present chaotic conditions a new order is bound to be established. Many theories are being continually advanced, designed to produce a new Utopia. The history of the world establishes the fact that all reforms necessarily come slowly. There can be no rapid realization of many obviously needed changes in our social system. But the world does not stand still, a forward and not a backward movement is inevitable. The encouragement and not the suppression of constructive thought and expression of thought would be of material assistance. In the annual address of Principal Fyfe of Queen's University, reference was made to the stimulation of thought by means of discussions in the class rooms. He is reported in part as follows:

"In our academic seclusion we sometimes catch from a teacher the echoes of the rebelling of the Universities of Canada are becoming 'nurseries of anarchy and revolution'. So far as such charges have any basis except hysteria, they may serve to encourage us, for they seem to indicate that students are in some measure acquiring the art of looking at both sides of disputed questions, an art in which it is our duty to encourage them. The ideal of suppressing equally and free speech, which has for the moment established a tragic dominance in many parts of the world, is nowhere more absurd than in a University, where men and women gather to exercise their faculties of curiosity and logic. Those faculties in them are necessarily immature; their utterances are often crudely dogmatic. But to stifle thought and utterance would be in a University the basest treason. As Penn said, 'Wherever is right, the persecutor must be wrong'."

"If we are to stimulate in our pupils objective thinking, we must be equally free in speech and thought ourselves—but not equally rash. Propaganda is no part of a teacher's proper function. He is not concerned to produce opinion; a temporary state of conviction which can be quickly changed by counter-propaganda. His aim is to stimulate the growth of intelligence, the power of detached judgment. To that end he may exercise in the class-room every art of sophistry, but if he thinks his way into the outer world, where opinions clash unanchored both from fact and reason, it behooves him to remember what astonishing weight that world attaches to a professorial pronouncement. The dignity of the University stands beside him on the platform, sternly demanding judicial sobriety. A University teacher should certainly be clever; he needs to be wise; and of the factors of wisdom not the least are self-restraint and kindness and patience."

## Has Given Good Service

Denver Man Still Driving Roadster Bought In 1910

C. C. Dill, a Denver roofing contractor, estimates that he has got 100,000 miles out of his 1910 roadster. He bought the machine in 1910, after it had been driven about 2,000 miles. In 1915 the speedometer gave up and stopped at 20,000 miles. Since then he has been driving it steadily, from coast to coast and from the Great Lakes to Alabama. Not once has it been involved in an accident or brought its owner into difficulties with the law.

## Chinese Form Of Torture

Used Skin Of Rhinoceros To Crush Political Prisoners

The ancient Chinese had some strange uses for the rhinoceros, according to a report by an American archaeologist. One form of torture was to wrap a political prisoner in the hide of a freshly killed rhinoceros. As the hide dried it contracted and slowly crushed the victim. Another use the ancient Chinese had for rhinoceros skins was for covering funeral caskets. Also, the armor of the bronze-age warriors was made of it.

The movement of sheep and lambs in Canada from farms to livestock yards and packers showed a substantial increase during 1925 and was well above the five-year average, 1920-1923.

## Change of Climate, Diet, Water Often the Cause of Diarrhoea

If you are suddenly attacked with Diarrhoea, Dysentery, Colic, Cramps, Pains in the Stomach, Summer Complaint, or any form of Bowel Trouble, do not waste valuable time, but get a bottle of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will relieve you. This bowel complaint remedy has been on the market for the past 88 years. Proof enough that you are not experimenting with some new and untried medicine.

Do not accept a substitute. Get "Dr. Fowler's" when you ask for it, and be on the safe side. Put up only by The T. McIlhenny Co., Ltd., Toronto, Ont.

## Gold Pouring Into London

Great Increase In Foreign Deposits Of Precious Metal

The golden tide, unexampled in the history of the world's monetary movements, continues to pour into London.

It began a year ago with a gold influx at the rate of \$25,000,000 weekly, then it increased early this year to \$62,000,000 weekly, and now it averages 45 millions weekly and shows no indication of declining. As soon as gold arrives in England from South Africa, Canada and other producing countries, it is bought by French, German, Dutch and American buyers, nervous about the financial state of affairs in their own countries, and stored in vaults in the vaults of London banks, where they know it cannot be touched. Already in the square mile that constitutes the city of London more precious metal has accumulated than ever King Solomon's legendary mines contained. The latest figures, covering a period of nine months, show gold importations valued at \$1,000,000,000. Exports reached less than \$500,000,000. Altogether, at the moment one billion and a quarter of foreign gold is stored in the city banks—a figure which exceeds any previous records in peace time.

Bankers do not want this gold; they cannot use it either to provide credits for industry or to keep their banks unemployed. Moreover, any fresh financial upheaval in Europe might cause its flight from London, with disastrous effects on sterling's international stability. Its uselessness is further emphasized by the fact that, although the London's vaults are bursting with it, the official government figures reveal that the British people's purchasing power in the way of wages and salaries has been decreased through an economy campaign by \$310,000,000 since the gold crisis of 1921.

## Wonder Of Modern Surgery

Doctors Can Renovate Faces After Awkward Disfigure

Persons whose faces are disfigured by disease or accidents no longer need live the reminder of their lives in horror of being seen in public.

Almost entirely new faces can now be "manufactured" by surgeons, according to Dr. George A. New and Frederick A. Figg, of Rochester, Minn. The doctors described the operations to members of the American Medical Association during the annual session of that group in Cleveland.

Operations to renovate faces are now performed after disease attacks away bone, cartilage and mucous membrane, or following the removal of tumors, the doctors said.

Artificial pieces are inserted in the chin, cheek, jaw-bones and nose; noses are "lifted" by means of pores, and skin and bone are borrowed from other parts of the body to be grafted to the face.

And when these things are accomplished the doctors asserted, the person again can face the world with something akin to confidence.

## Making History

Great Seal And Royal Signet Given To South Africa

British Empire history was made recently when King George handed to Charles de Water, South African high commissioner to the United Kingdom, the great seal and royal signet of the union. The king's act made South Africa the only Dominion to possess a great seal of its own.

The South African seal, struck at the royal mint, bears the king's head on one side and the South African coat of arms on the other.

Canadian production of timothy seed is less than one half of domestic requirements, as indicated by importation statistics, while substantial export surpluses of alfalfa, sweet clover and Canada blue grass are usually produced yearly.

The Christian Science faith built a new publishing house in Boston during the years of depression and stagnation for it is cash and never held a garden party at a church supper.

The growing of field corn for grain production in Canada is practically confined to Ontario.

## Agricultural Notes

Interesting Items Gleaned From Many Sources

More than two-thirds of the bromine and western eye grass seed of commerce in Canada is sealed in the sack and certified to be free from the seeds of couch grass.

The trading room of the Winnipeg Grain Exchange is connected by telegraph with all important grain markets and is in direct access by telephone and telephone to all parts of Canada and, indeed, to all parts of the world.

Experiments conducted both in the United States and in Canada have shown that the two species of lice infesting cattle are easily controlled by sodium fluoride, applied either as a powder or in solution at the rate of one ounce to a gallon of tepid water.

Nature played a significant part in causing the wheat surplus condition, notably by high yields in 1928 after dry weather in 1927, in giving Europe excellent grain crops in 1929 following big crops in 1928, and in giving Russia large crops in 1930, and Europe record crops in 1932.

Individual tubes of cream, after the style of toothpaste, have been placed on the market in Germany as a means of carrying cream. Each tube has a round flat base which enables the tube to be stood upright, and holds a sufficient quantity of cream for one cup of tea or other beverage.

Regarded as a harmless nuisance a few years ago, the economic importance has now reached an important place where he has no longer to apologize for his existence. Such organizations as "spray services" are known and valued by those who use them.

The keeping of livestock is one of the oldest occupations of civilized man. It represented the wealth of all the nomadic tribes and peoples, and the principal reason why those people were nomadic arose from the necessity of constant movement in order to provide grass and water for their flocks and herds.

For having marked cheese with a false date of manufacture, a factory manager in Eastern Ontario was convicted and fined. The provisions of the new regulations under the Dairy Industry Act require the correct date of manufacture to be marked on the cheese within 24 hours after removal from the press.

The more recent demand for lighter weight cattle showing a better finish, the question of international trade relations involving tariffs and embargoes, marketing standards and allied financial conditions generally, all have a significant influence on beef production not only in Canada but in all the beef producing countries of the world.

Legislation giving some degree of control over the marketing of natural products, mainly agricultural, is found in most of the principal countries of the world, and The Natural Products Marketing Act, 1934, of Canada is an attempt to give the Dominion legislation similar to that at present found in the statutes of the United Kingdom, Australia, and other parts of the Empire.

Annual pasture crops are important in many parts of Canada. In the prairie provinces, perennial grasses and legumes cannot be depended upon to supply grazing during the periods of dry weather which occur almost every season. This is the case also, though not to the same extent, in Ontario and Quebec. The most feasible method of overcoming this difficulty is to seed one of the grain crops to provide pasture when the perennial grasses are unproductive. The cereals used as annual pasture crops are oats, barley, wheat, and spring rye, oats being by far the most important for this purpose. Scientific Agriculture.

## Glass Is Latest Vogue

Glass and steel are the vogue for modern homes in England this season. Glass what-nots and chromium-tubed easy chairs are among the most popular pieces. Glass beds are coming into style. Steel drawing rooms and glass bedrooms are considered the latest in human habitation.

Red tape can slow up business even worse than red lights can traffic.

## Appoint Commission

To Inquire Into Claims Of Alberta For Further Resources Compensation

Hon. Andrew K. Dymally, judge of the Manitoba court of king's bench, Hon. Thomas M. Tweedie, judge of the supreme court of Alberta, and George C. Macdonald, Montreal, have been constituted a commission to inquire into claims of the province of Alberta for further compensation with respect to the administration and control of its natural resources. Announcement of the appointment was officially published recently. Mr. Justice Dymally is chairman.

With the exception of Mr. Justice Tweedie the commission is the same as that which investigated similar claims on the part of Saskatchewan recently. On the completion of the Alberta report the commission will render to the federal government joint recommendations on behalf of both provinces.

## Secret Method Revealed

How Scotland Yard Determines Age Of Finger Prints

Scotland Yard's secret method of telling the age of finger prints was revealed in the commission in London during the trial recently of John C. O'Connor, charged with breaking into the Lady Margaret Day Nursery. Evidence against him was a thumb-print found on a clock, but O'Connor said he had only handled the timepiece in 1932. Detective-Sergeant Jack Livings, of New Scotland Yard, said he had no doubt the fingerprint was that of O'Connor. He added: "The powder we apply to latent impressions to bring them out will stick to the ridges of a new print, but an old one is dry and the powder will not adhere to it. A fresh print can easily be removed by a duster, but a stale one can only be removed by a damp cloth."

The principal European countries, notably France, Italy and Germany, have stringently controlled the imports of dairy products during the past few years by tariffs, quotas, and other means. This has resulted in a steady increase in the quantities of butter and cheese exported to the United Kingdom.

Both the production and consumption of oats in Canada have followed a downward trend since 1920.

## "It Helps Me!"

That's what 98 out of 100 women say after taking this medicine. It quiets quivering nerves, gives them more strength before and after childbirth, helps them over Change of Life... makes life seem worth living again.

## Oats Proven To Be The Best Annual Hay Crop, After Tests Made At Experimental Farms

Interesting data on cereal grain crops for annual pasture are given in the June number of Scientific Agriculture as a result of investigations by Dr. Kirk, Dominion Agronomist, Ottawa; J. G. Davidson, assistant superintendent, Dominion Experimental Farm, Indian Head, Sask., and S. N. Hamilton, Division of Chemistry, Ottawa. It is pointed out that annual pasture crops are important in many parts of Canada, and that, while the superiority of oats as the one best annual hay crop has been generally recognized throughout Canada, it is not so clearly appreciated that oats are also the best annual pasture crop. The data submitted in Scientific Agriculture supports the view that the oats crop is even more valuable for pasture than for hay as compared with other cereals.

There are certain questions relating to the use of cereal grains for pasture that have not been investigated. Definite information is lacking on the relative productivity and nutritive value of the different cereals. It is not known which of them has the greatest power for growth after having been eaten off, and which of them will produce the greatest number of pasture crops in a single season. Several other questions also require answering. What is the best time to begin pasturing? How does the percentage of protein in the herbage compare at different stages of growth? Will the fresh young growth provide a high protein feed as is the case with perennial grasses, and, if so, is the total seasonal yield of protein satisfactory? Are the results better with early than with late seeding, and how do the different cereal crops compare in this respect?

In order to answer these questions, an experiment was started in the spring of 1932 at the Dominion Experimental Farm, Indian Head, Saskatchewan. Four cereals were grown, namely, oats, barley, wheat and spring rye. These were cut with a horse mower to stimulate grazing. Provision was made for five plots of each cereal, clipping to begin at different stages of growth at (1) 3-leaf stage; (2) 5-leaf; (3) short blade; (4) early heading; (5) fully headed, and as often thereafter as the growth reached seven to eight inches. These measurements refer to the leaf mass, and the following is the summary of the results obtained. Oats, barley, wheat and spring rye were compared with reference to yield, feeding value, and utilization as annual pasture crops. With respect to yield of dry matter per acre and per cent of protein, oats were always superior to barley, followed in order by wheat and spring rye. In total average yield of protein per acre from the early seeding, oats exceeded barley by 64 per cent, wheat by 96 per cent, and spring rye by 112 per cent. At the later date seeding, oats exceeded barley by 23 per cent, wheat by 53 per cent, and rye by 85 per cent. Oats produced five cuttings in 1932, and seven cuttings in 1933 as compared with four cuttings in both seasons of the other three crops. Largest yields of protein per acre were obtained from oats when pasture cuttings were begun at the 5-leaf stage. Oats from the early seeding produced 3,000 pounds of dry matter per acre, with an average protein content of 25 per cent. This is equivalent to a greater carrying capacity than was obtained at other stages on good quality native bluegrass seed. Young oats herbage may be regarded as a highly concentrated protein feed.

During the first five months of this year, 935,560 pounds of dressed poultry have been exported from Canada to the United Kingdom. Compared with the corresponding period of last year, this is an increase of 537,122 pounds, and the demand for Canadian poultry still continues. Most of the poultry shipped was packed, inspected, and graded according to government standards.

W. N. U. 2038

### Radio Discovery

#### Find That Radio Signals Reach A Height Of 1,000 Miles

The highest point yet reached by human signals, a "refracting region" 1,000 miles overhead, which reflects wireless signals back to earth, has been discovered with Harvard instruments.

From 100 to 200 miles aloft is the ordinary height of the layers of air known to reflect wireless waves. Previously the very greatest height of such layers has been about 500 miles.

But 1,000 miles is above the regions at which scientists ordinarily describe as the outer limits of the earth's atmosphere. And the Harvard discoveries may lead to a redefinition of the effective heights of the atmosphere.

By Ruth Rogers

#### SMART FOR WARM DAYS—TOWN OR COUNTRY

Keep cool in sheer cotton no matter how high thermometer climbs. Here's a perfect summer dress for casual daytime wear. It's the cool sleeveless type with ruffled caped shoulders, that you can wear to town as well as for the country.

Chiffon cotton voile print, so soft and pretty, made the original. It's tubular, too.

In turquoise blue, aqua-blue, ice-cream pink or white tub silk, it's very charming.

Stuffed handkerchief linen, dotted sheer lawn, eyelid tulle, etc., are also cool and smart mediums.

Style No. 388 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 16 requires 3 yards of 36-inch material with 1 1/2 yards of 36-inch contrasting.

Price of pattern 20 cents in stamps or coin (not preferred). Wrap coin carefully.

### New Zealanders Healthy

#### Average Life Span Considered To Be World's Record

Will it be possible for us to increase our life span by 10 years?

Gaining inspiration from the example set by New Zealand we should be able at least to increase the average life span of American men 8.8 years, from 59 to 67.8. Women apparently need not strive so ambitiously for longevity; in living to the average ripe old age of 62 they already have the years lead over men in the march of life.

Men and women live to average ages of 65 and 67 respectively in New Zealand, which Metropolitan Life Insurance Co. statisticians consider to be a world's record. They state that the white population of the United States still has about 16 1/2 years to gain before reaching a hypothetical ideal estimate of a little more than the Biblical three score and ten. An advance toward this has already been made, reports show, during 1932 and 1933 which were exceptionally good health years. Encouragement comes with the report that since the beginning of the century a gain of 10 years in the expectancy of life of white males and 11 years for white females has been scored.

Excellent health management, particularly in the case of childbirth, is cited as a reason for New Zealand's in excellent record. In the care of mother and child during a baby's infancy, medical effort is expended with the greatest effect. For girl babies the mortality rate has dropped to the exceedingly low figure of 25 in a thousand in comparison to 48 for the United States. The corresponding figures for boys give 69 deaths per thousand against 33 in New Zealand.—Science Service.

#### Largest Ruby Found

Believed to be the largest in the world, a ruby weighing 2,567 carats, has been found in a village near Ratnapur. Experts state the gem, which weighs nearly two pounds, is defective in color, being pinkish instead of deep red. It is impossible to value the stone accurately until it has been cut.

The total annual consumption of alkali sold in Canada is estimated at 1,500,000 pounds, so that any production over this amount requires to be exported. The production last year was about 4,000,000 pounds. The average price received by Canadian growers for alkali in the past five years has been about 10 cents per pound basis No. 1 grade.

## Floating Power Plant To Provide World's Cheapest Electric Power From The Waters Of The Sea

### A Heartening Sign

#### Recovery Of Canada's Newspaper Industry Is Good News

One of the most heartening signs of the times is the recovery taking place in Canada's newspaper industry. For May (the latest available figures) the production exceeded by well over one million cwt. the production in May, 1933, while for the twelve months ending May the production was some 10,000,000 cwt. in excess of that for the previous 12 months.

This means much more than benefit for newspaper workers, or for the holders of newspaper securities. The newspaper industry is one of the greatest in Canada. It is one field of production in which this country holds a supreme place, and it is not too much to say that crisis through which the industry has passed contributed tremendously to the general depression.

Perhaps, too, the lessons of the past three or four years will mean future gain. They may have taught that in the newspaper industry, as in others, there can be such a thing as more of stocks and bonds and high financing than the traffic will bear.—Ottawa Journal.

### Golden Rod

#### Has Nothing To Do With Hay Fever

Golden rod has nothing to do with hay fever and all the sneezes in the world won't shake the belief of W. Ormiston Roy, Montreal naturalist, who has been working the thing up in collaboration with Professor E. H. Wilson, of Harvard University.

Messrs. Roy and Wilson returned from the Gaspé peninsula and have made a report which bears out the belief of the late Thomas Edison that ragweed and not golden rod is really a sible for pernicious hay fever.

### Aviation In Australia

Australia is going ahead rapidly in organized civil aviation. In less than a year 40,000 passengers, 70,000 pounds of merchandise and 35,000 pounds of mail have been transported by air over the country. Australia has a population of less than 6,000,000 so that she is doing very well in the air.

### SISTERS WIN HONOR FOR MURALS

Featuring the Mexican mural painting movement which has achieved international fame in the past few years, the participation of two Brooklyn sisters, Marion and Grace Greenwood, whose panels have aroused the favorable comment of Mexican and foreign critics. The Greenwood sisters, aided in their study of fresco technique by Paul O'Higgins, young California painter, obtained walls for decoration in Morelia, State of Michoacan.

Professor George Claude's floating power plant was completed at Dunkerque, France, recently, and he was prepared to turn out the world's cheapest commercial electric power. The power will be used right on board the ship to manufacture 1,000 tons of ice per day, he told 150 invited guests, all engineers. The French scientist will utilize thermal difference between surface and depth waters of tropical seas to create power.

Following experiments in Cuba in 1931 when he dropped a tube a mile and on-eighty long into Matanzas Bay to prove that power could be made by his process, he secured financial aid and himself purchased the steamer Tunisie, which French shipyards have just equipped with a power and refrigerating plant.

The ship is a nightmare of Jules Verne with its bridges and decks laced with pipes, cylinders, valves and meters, all designed to aid in drawing electrical power from the sea. Professor Claude himself explained his process to his guests.

"The George Claude process consists essentially in causing warm surface water of tropical seas to boil in a vacuum, put the steam to work in the turbines and condense it by cold water from the depths."

"Experiments made in 1928 and in Cuba in 1931 on a small scale confirmed the theoretic findings. It remained to put them into a plant industrially exploitable."

"As I had to finance it myself, I thought of a flexible method; to equip a floating plant permitting the use of a relatively short vertical tube and installation in interesting points of the equatorial zone."

Professor Claude said it had also occurred to him to utilize the plant to make ice.

The plan calls for a tube with a 30-foot buoy to be dropped and anchored to the bottom. A 2,300-foot tube, composed of 112 soldered sections, and nine feet in diameter, will bring the water to the plant from the depths. The tube itself will contain a vacuum boiler 80 feet long and 20 feet in diameter placed 35 feet beneath the surface of the sea.

An air extractor will make the vacuum in the boiler and vacuum pumps will pump up the water and pump the warm water as well.

The huge cylinder will contain four compartments for boiling and five for condensation. The steam produced in the boiling chambers will pass into the condensing chambers after passing through the turbines and creating power.

The cold sea water will do the condensing.

### Eyes Getting Tired

#### Negro Claiming To Be 140 Ashed Occlus For Test

A claimant to succeed the late Zoro Agha of Turkey as the world's oldest living person, appeared at a hospital in Rio De Janeiro to have his eyes tested. Hypolito Xavier Ribeiro, a negro, asserted he was 140 years old, and that he was beginning to have difficulty reading classical advertisements in the newspapers. Physicians were inclined to credit his claim that he was born in 1794 as a slave, and participated in a revolution of 1842 and the Paraguayan War of 1865. An oculist pronounced his eyesight perfect—only "somewhat tired."

### Canada's "Sun Porch"

Lord Willington once referred to the British West Indies as Canada's "sun-porch." So far as the Bahamas are concerned they have become much more than that. Last year the Bahamas purchased goods from Canada to the value of \$1,265,790, an increase of five per cent. over the year before. Practically all of the potatoes going to these islands were supplied by Canada, also butter, flour, oats, condensed milk, rubber and canvas boots and shoes.—Ottawa Journal.

December 21, 1620, was the date of the landing of the Pilgrims on Plymouth Rock.

## Labor Outlook is Improving

Labor Day, 1934, found a large number of them and women in the Dominion still out of employment, but general business and trade conditions continue to show improvement and the outlook is brighter than any time in the past four years. Many big construction projects have been inaugurated or planned and the ambitious public works program launched by the federal government will materially assist in the creation of employment. There is every reason to believe that the most difficult stages of the depression, from the standpoint of labor, have been passed.

Four serious labor disputes are in progress in Canada at the moment. In at least two of the four strikes the revolutionaries behind the scenes are largely responsible for the workers' decision to quit work. Generally, however, Labor Day found industrial peace throughout the Dominion and a more optimistic viewpoint entertained by both capital and labor.—Calgary Herald.

## The Profit Motive

In our humble opinion the Stevens Mess Haying Commission has put its finger on the "sore spot" in our Canadian economic life. The goal of business today is "profits." It is the chief aim of all concerned, from the president of the company and the board of directors down to the most petty boss, to produce profits. Every other consideration—humanitarian, social, or moral, is secondary to this one all-consuming passion to make more money. The principal question isn't "how good can we make the article," or "how cheaply can we sell it?" but "how much can we make on it?"

The method of producing large profits has always been to keep the prices of raw material and labor low, and the price of the finished article high. This has been accomplished, not by competition, but by co-operation. Prices of raw material and labor have been "fixed" by the heads of large corporations. The price of the finished article has also been agreed upon. Thus, to stimulate foreign competition, big business has gone to the government and asked for a tariff wall to protect their fixed price, and the government has done their bidding, thus giving big business the privilege of "holding up" the Canadian public and taking from them as much profit as they may desire.

For illustration let us take one article, "puffed wheat." It has been estimated that the actual cost of producing a pound of puffed wheat is not over 10 cents, yet we have to pay 60 cents per pound. Where does the other 50 cents go? It goes for profits into the pockets of the manufacturer, the middlemen and merchants. Is it any wonder that this class can maintain a standard of living much higher than the original producer?

The cause of the poverty of our producing classes is that their goods and services cost them too much. Those who finish and distribute the necessities of life charge too much for what they do. They are not satisfied with a fair price, they want

## Melvin Notes

Mrs. Harold Bliss is staying with her parents Mr. and Mrs. August Kreke while Mr. Bliss is recovering at the different sanatoriums.

Miss Marian Leeson of Calgary spent the weekend with her parents Mr. and Mrs. F. W. Leeson.

Labor Day guests at the Peter Johnston home were Dr. and Mrs. Sawdon of Three Hills and Mr. and Mrs. Trevor of Didsbury.

The turn of the three-day machine is based in the district.

Miss Dorothy Youngs is at the Didsbury School where she taught last year. Miss Mildred Leeson is teaching at the Didsbury school this year. Miss Ruby Klinek is teaching at Springfield school west of Calgary.

Mr. and Mrs. Ward Wynne of Didsbury spent Sunday evening with Mr. and Mrs. Geo. Youngs.

Mr. Maurice Pemberton of Calgary returned home Saturday after spending a month with Mr. Chas. Youngs.

Mr. and Mrs. Dupont entertained a number of visitors from Calgary on Monday.

Miss Marian Johnston spent last week with her grandparents Mr. and Mrs. Taylor of Didsbury.

Don't forget the free clubs sponsored by the W. I. to be held at Mrs. White's on September 12. Parents should see that children of pre-school age should attend.

Miss Ray is at her post again. School opened Tuesday with a full attendance.

## Burnside Notes.

Long Pine W. I. will meet next Thursday, September 13 at the home of Mrs. Bert Pines.

Born: In the High River Hospital on Saturday, August 4 to Mr. and Mrs. Lewis McCulloch (nee Violet Viny) a son.

Messrs Percy Saunders and Fred Tool spent Thursday in Calgary.

Messrs Jack Clark and Bill Jenkins have gone to Calgary to attend Normal School.

Mrs. Florence Korschuh of Didsbury is helping Mrs. Hicks to pack for Mr. Kasper Sanford's threshers.

Mr. Hugh Nelson left Saturday with her daughter Miss. Lena. Mr. Nelson and a party of friends for a three weeks' visit to the coast.

The many friends in this district of Mrs. E. M. Walter, who formerly taught the Didsbury school, will be interested to know that she is at present travelling in Russia, spending a month at the University of Moscow and visiting the Volga and Amur River districts, after which she will return to England for a visit with her parents before leaving again for Canada.

## Big Honey Average

Striking one of the highest averages per colony for honey production in the history of this province. Duncan Chalmers, prominent Edmonton honey grower, has reported to the provincial agricultural department an average production from his 80 colonies of 320 pounds. This, according to departmental officials, forecasts a high average for colonies in Northern Alberta if favorable conditions remain until the end of the season. In the south, where large individual honey crops are obtained, some very big yields are also expected.

more than it is worth.

In the last decade the government by its legislation has discouraged competition. Those who have studied our laws know that they favor and have been designed to protect the large corporations. We are suffering from too much class legislation. What we need is legislation which will benefit all the people and give everyone a chance to get ahead. The great question before us today is not "how shall business operate at a profit?" but, "how shall the people live?" Contributed.

**Alberta Crop Report.**

Harvesting of Alberta's crops has been pushed rapidly towards conclusion during the past two weeks under ideal weather conditions which have prevailed over the entire province with the exception of a brief cool, wet spell on August 30 which was general. Cutting is fairly well completed in most of the central and southern districts and is well advanced in the northern sections.

While a conclusive estimate of the 1934 wheat crop will not be possible for some time yet, there is sufficient information in the hands of the department to establish only definitely that the average wheat yield over the seeded area of the province will be considerably above the average for the past ten years, namely, 17 bushels per acre.

The estimate of the area seeded to wheat in Alberta this year is placed by the Dominion Bureau of Statistics at 7,501,000 acres compared with 7,298,000 acres in 1933, and 8,201,000 acres in 1932.

A number of factors combined during the season to reduce what gave early promise of being a large crop of wheat and other grains.

In southern, south-eastern and eastern districts drought and grassy-woolers were strong deteriorating factors. In the southern districts, however, on the whole, a fairly large volume of wheat has been produced. The best crops are being found in the areas along the international border, from Cardston to Lethbridge and through to Medicine Hat, south of the C.P.R. Cross-line. Some surprisingly heavy individual yields are being reported from this territory. Along the western side of the province north to Calgary there are also some very good crops. The total volume of wheat, on the Lethbridge division of the C.P.R. which extends from Dummore on the east to Crow's Nest on the west and north to Okotoks, will be fairly substantial and of generally high quality.

In the south-eastern district, east of Dummore, north of the South Saskatchewan river and south from Stettler and Coronation, crops generally have again been largely a failure and the total yield of all grains will be very low.

In the central area of the province, from Ponoka south to Olds, and from the mountains east to the Saskatchewan boundary, an unusually dry season has been experienced. Crops of all kinds have failed to develop to the extent first anticipated and the total yield of wheat and other grains will be normal in this territory, which is usually productive of good crops. There is also a shortage of feed in many localities in this area.

In the north-central area, which centres upon Edmonton, in which heavy yields of all grains have been anticipated, a frost, registered on the night of August 22, did damage to uncut and unripe crops. The area affected was from Athabasca on the north to below Red Deer on the south and from some miles west of the C. and E. line to the eastern boundary of the province, and the frost varied in intensity from five to ten degrees. On the night of August 30 a further frost was registered in the area from Edmonton east and north-east, but of lighter degree. While it is impossible accurately to estimate the extent of damage to wheat crops until threshing is under way, the general indication at present is that there was a large area of wheat which will suffer in quality to the extent of one to two grades. South and south-east of Edmonton, a good deal of the wheat was either cut or fully ripe, but individual fields undoubtedly suffered some damage. In the districts just west and north-west of Edmonton, and to the north, north-east and east, as far as the border, the damage appears to have been somewhat greater. Much of the grain in these districts was still uncut, and some of the wheat crops were rather badly frozen, while oats and barley crops have apparently suffered less. In addition, potato fields and garden stuff were considerably damaged.

Peace River districts have escaped from thus far and harvesting is being pushed to conclusion with every prospect that the crop will be one of the best ever taken off in that territory.

**Notice to Relatives of Persons On the Assessment Roll And to Tenants**

Notice is hereby given that during the months of September and October applications may be made under the provisions of sections 188 of the Town Act for inclusion in the voters' list of the Town of Didsbury by the following persons, namely:

The wife, husband, father and mother, and every son and daughter of any person whose name appears upon the assessment roll are entitled to be placed upon the roll.

(a) If he or she is resident with the said person within the town or assists him in business in respect of which he is taxable; and

(b) If he or she is of the full age of twenty-one years; and

(c) If his or her name does not already appear on the roll.

Tenants who have rented an assessed parcel for a period of twelve months immediately preceding last day of August of this year.

**TOWN OF DIDSBURY**

W. A. Austin, Sec. Treas.  
August 29th, 1934.

**NOTICE**

In the interests of public health, and in order to prevent, if possible, the recurrence of an epidemic of dysentery, all citizens, including vendors of food and restaurant keepers, are urged very strongly to see that all screen doors and screen windows are made tight. "Prevent flies from getting in, but let them get out."

See that as much garbage as possible is burned, and if you cannot burn it all, have it placed in covered containers to await removal by the scavenger.

All toilets should be made tight. Make all requests for scavenger or sanitation service at the Office of the Town Secretary. Prompt attention will be given to such requests, and it is hoped that each and every citizen will cooperate in keeping the town clean.

—By Order,  
Local Board of Health,  
Didsbury.

**NOTICE OF TIME AND PLACE OF NOMINATION.**

**TOWN OF DIDSBURY.** Municipal Election to fill one vacancy caused by the resignation of Councillor Ward C. Keith.

**PUBLIC NOTICE** is hereby given that I will attend at my office in the Town of Didsbury, on Monday, the 10th day of September, 1934, from eleven o'clock in the forenoon until twelve o'clock noon, for the purpose of receiving the nominations of candidates for the office of councillor to serve during the unexpired term of Councillor Ward C. Keith, resigned, given under my hand at Didsbury, Alberta, this 30th day of August, 1934.

W. A. Austin,

Returning Officer.

**Mountain Bird Notes**

Miss Marjorie Birdsell was a passenger on the northbound train Wednesday morning. She stopped over at Lacombe to visit her brother at the Dominion Experimental Farm on her way to Dunstable Alta where she is engaged as teacher.

Miss D. Brown returned Sunday to resume her duties at Mana school. The school has been redecorated and painted outside during the vacation.

Mr. Gulliver succeeded Miss Barker at Neopits, M.T. after following Miss Birdsell at Neopits, while Miss Alice Pearson takes over Rosedale, this being her fifth year.

Mr. Jack Stole had the unfortunate to hurt his leg on Saturday while working around his land and is unfortunately laid up for a time.

The annual school fair is to be held at Community hall on Saturday, September 8th.

## WORLD HAPPENINGS BRIFFLY TOLD

Gordon W. MacDougall, K.C., was appointed a director of the Royal Bank of Canada. Announcement was made following the regular meeting of the board of directors.

Portrait of the wall of Alice Stephen, Baroness Northcote, shows the baroness left the bulk of her fortune of \$1,825,000 to assist migration to Australia of British children.

Lifting of the ban against competitive games in London parks on Sundays has been recommended by the parks committee of the London county council.

July was the driest month in at least 20 years in Quebec, according to records at McGill observatory. The total rainfall for the month was only .85 inch. In July, 1914, the total fall was 57 inch.

Flare gnawing at electric wires are believed responsible for flames that broke out in the attic of the medical school of the University of Western Ontario, causing damage estimated to run into several thousands of dollars.

Three more governments have pledged themselves to place an embargo on war materials destined for the Bolshya-Pargunay war in the Chaco. It was announced at Geneva. The countries are Lithuania, Portugal and Uruguay.

## Little Journeys In Science

WATER

(By Gordon H. Guest, M.A.)

Water is the most familiar of all chemical compounds. It covers about three-fourths of the earth's surface, the greatest depth of the ocean being about six miles. It is an important component of the air, and even "dry" land contains considerable quantities of water. It constitutes about 82% of beef, 87% of milk, 92% of watermelons, and 95% of cucumbers. Thus, when we buy normal milk we pay for about 87% water.

Living things, both plants and animals, cannot exist without it. Excessive shipping, fishing, and other industries result from the fact that three quarters of the earth's surface consists of sea water, and in addition, there is a great volume of fresh river and lake water no necessary to human beings and other creatures not inhabiting the sea.

Steam power is derived from water, and other mechanical power is obtained from falling water, as at Niagara where electricity is generated on a very large scale.

Pure water is colorless and tasteless. In thin layers it has no color that can be detected, but it has a bluish tint when observed through considerable thickness. When sufficiently cooled, it solidifies to a colorless solid commonly known as ice. When heated it boils and changes rapidly into water vapor, commonly called steam.

There is a general law of nature that substances expand when heated and contract when cooled. Fortunately for man and other living creatures water does not always follow this law. When warm water is cooled it contracts according to the law of expansion and contraction until it reaches four degrees below zero. For some reason, which scientists cannot explain, from four degrees down as far as you wish to go water expands instead of contracting. Now, if it expands it will be lighter than it was above four degrees, and hence the cold water will rise to the surface. When the temperature drops to zero ice forms at the surface first, and then layer after layer is formed from the surface down as the temperature remains below zero.

All would be different if water followed the law of expansion and contraction rigidly. The water would become heavier as the temperature approached zero and this heavy cold water would drop to the bottom of lake or river. Ice would form first at the bottom and as the winter progressed the lake would freeze from the bottom up, until it was converted into a solid mass of ice. All water animals would be destroyed and the warmth of summer would not be sufficient to thaw it out.

## LIVE AT HOME

By JACK MINER

There is no human power that can convince me that our loving God is to blame for this present crisis. The fact is for over four years we have allowed ourselves to go blind thirty mad, right from the bar-room to the pulpit, and God did not settle all this world's affairs on November 11, 1918, for since that we have gone extravagantly crazy. Yes we have a vast throng of ten cent millionaires Oriental pony seeds. Yes, and we have allowed ourselves to drift to make this little spot nearer and dearer to your heart. Grow your own potatoes, cabbage, and other vegetables. Oh, yes, and if far enough south, plant a dozen mulberry trees. If in the north, plant Mountain Ash. Watch for people who have nice flowers and kindly ask them for a few plants such as Iris, ask them for some hollyhocks, delphiniums, or cacti. Watch for people who have a few sprouts from their lilac and

A view of Jack Miner's home from the Public Highway. Notice the flowers planted by the side of the road.

away out and plunge head first into imaginary happenings, as someone has said, "Like a blind man in a dark room looking for a black cat that is not there." Now we are beginning to wake up and find we have been fishing on the wrong side of the boat. Yes, we begin to realize we have missed a golden opportunity and are dissatisfied with ourselves and everybody else, but here we are a thousand

Photo shows automobiles parked along the Public Highway in front of Jack Miner's home showing public sentiment in the place.

miles from home and nothing to show for it. Now to those of you who have no one of your own, please let me advise you to try the "live-at-home" remedy. Take ten per cent of the money you have extravagantly spent the last five years and buy at least five acres of Canada's cheap land.

Remember, Canada has the very best helpful forestry department; get in touch with them and watch for wild flowering shrubs, such as hawthorns that you can plant yourself

when you are paying rent for four brick walls. And oh, what a blessed change. In a few short years you will find yourself living in your own little planned and built cottage, perfectly surrounded with a little bit of heaven and the fragrance, keyed up by the songs of a variety of birds that come floating through upon your open window.

My dear friend, this is a dream, but it can be done and you can do it if you will only cultivate the desire. My grey hairs and scars of experience have compelled me to believe that a man can accomplish nothing anything he concentrates on. Let us all thank God that things are as well as they are with us and help ourselves by entertaining more "live-at-home" desires.

## Noted Horticulturist Dead

Ernest Hutchinson was Charter Member of B.C. Fruit Growers' Association, 81, who was the first horticulturist at the Ontario Agricultural College at Guelph, Ont., who gave instruction in 1879 to Hon. W. R. Mowbray, former Dominion minister of agriculture, is dead at Ladner, B.C., where he had resided 52 years.

Mr. Hutchinson resigned from the Guelph college in 1880. With the late Thomas McNeely, he set out probably the first commercial orchard in British Columbia.

He was one of the founders and charter members of the B.C. Fruit Growers' Association and was appointed the first fruit pest inspector in the province. In 1908, Western Australia applied to the E.C. government for a man to frame and enforce a fruit pest act for the state and Mr. Hutchinson was named. He remained on the government staff in Western Australia for 10 years.

## Airport At Gretna Green

Mecca For Eloping Couples Is Up-To-Date

Gretna Green, Scotland's famous mecca for eloping couples, has just opened an airport and is eagerly awaiting the arrival of the first pair to elope by air. Richard Renison, the blacksmith "priest," who has married 2,460 couples over his anvil, plans to hold an air pageant shortly. The first couple arriving by plane will be married free of charge and will be given a wedding present.

## New Type Of Wool

Secret processes which make wool unshrinkable, remove the tickle, and add lustre are understood to have been perfected at the Wool Industries Research Association laboratories at Torsland Leeds. For the present these processes are being revealed only to members of the association.

One of the most important influences in the volume of cheese production per hundred pounds of milk is the butter-fat content of the milk.

The production of milk in the province of Quebec is more important than the production of beef.

## More Accurate Than Physician's Forecast

French Scientist Says Spectroscopic Foresees Approaching Death

The spectroscopic, which records the birth and the decay of stars, can also foretell the approaching death of man.

A spectroscopic death curve, which forecast a human death more accurately than the physician, was described to the Massachusetts Institute of Technology spectroscopic conference, which met in Cambridge, Mass., to discuss both practical and scientific uses of this instrument.

The report was made by P. and M. Lecomte de Nouy, of the Pasteur Institute, France. M. de Nouy did not attend, but mailed his paper to Professor George R. Harrison, chairman of the conference.

The death curve was found in a spectroscopic examination of human and animal blood. Spectroscopic curves are like city skylines such as New York and London, which reveal wide architectural differences, which never would be mistaken for each other, and which an expert would never forget.

"The curves," M. de Nouy's report states, "show remarkable constancy, whether man, horse or sheep serum is used."

"Alterations in the curves must correspond to very deep chemical modifications affecting the chromophoric (color) elements which belong to very stable chemical groups."

"We predicted a man's death, which followed in 24 hours. He was partly paralyzed, owing to a malignant tumor of the spine, with metastases in the lower jaw; and urinary infection. He was expected to live, however, for many months."

M. de Nouy does not say how sensitive a death barometer he finds this blood curve.

"Only important departures from the average," he states, "should be safely interpreted as an indication of pathologic disturbances. Such alterations are rare and seem to correspond to fatal cases."

## Saskatchewan Butter

June Output Of Creamery Butter Reached High Levels

The June output of creamery butter in Saskatchewan jumped to a new high mark of 3,724,315 pounds, exceeding the previous record month by almost 475,000 pounds. Those figures were released, recently by the bureau of publications. The greatest part of this increase was reported from the northern section of the province, where pasture conditions have been better than in the south. Even the southern part of the province, however, shows a small increase. The north showed a percentage increase of 35.2 while the central section increase was 29.8.

The Canada thistle is not native to Canada. It was introduced originally from Europe.

Bakelite is an artificial carbor product used as a substitute for hard rubber, celluloid, or amber.

## Dr. Wernet's Powder For FALSE TEETH

A Joy To All Users  
Can't Slip or Slide

Sprinkle on Dr. Wernet's Powder and you won't have to think about your false teeth all day long. Joyous comfort is yours. Eat anything you want—it holds parts firmly in place—they positively can't slip or slide. Forms a protective cushion for sensitive gums. Leaves no colored, gummy residue. Keeps mouth sanitary, breath pleasant. Prescribed by world's most noted dentist. The cost is small—the comfort great. Any druggist.

## OCCASIONAL WIFE

By

EDNA ROBB WEBSTER

Author of "Joretta", "Lipstick Girl" Etc.

### SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is a neglected daughter of a wealthy family. She is not to inherit money when she comes of age and is so studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter; Sylvia Todd, Peter's model; and Gus Matton, his former roommate with whom he has quarreled. After a party at an exclusive club, when the rest of the members of the party go to a cocktail to continue the party, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they wake it is early morning and Avis and another boy are standing near them. "Go—make it necessary for Camilla to announce before the party that she and Peter are married," Camilla urges Peter to do some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Werth calls and persuades Peter to accept a loan of \$1,000. Peter insists he exhibit and asks Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth" and Avis inspires Peter to adopt the latter title and Camilla, heartily going to Peter's studio for quiet and rest. Peter and Avis follow later, and as the lights are turned on, see the statue has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he has sculptured especially for her as wedding gift. They named it "Land of Hope". Camilla's advertising campaign was a success from the beginning, and it was arranged to have radio broadcasts, in addition to newspaper advertising. Camilla to both write the Tiny Tots stories and to deliver them over the radio.

Peter's exhibit was awarded the Paris scholarship, and the preparation for his journey to France.

(Now On With The Play)

### CHAPTER LV.

Camilla powdered her nose and drew her hat over her head at a part angle, but her movements were mechanical. She was thinking neither about her nose nor the angle of her hat. Her hands trembled a little, with excitement and apprehension. In another half hour, she would

be speaking into the microphone to—thousands, perhaps. There also was a possibility that she would be speaking to no one, except Peter. She laughed shakily at the thought. All that effort and anxiety and expense, just to speak to Peter?

But she knew that would not be true. The response to her Tiny Tots had been too convincing of her public's interest, and the advertising of her radio programs too thorough to deny her an audience. She envisioned that audience now, vaguely, reaching far out into limitless space, instead of her own chic figure in the dressing room mirror at the office. Her new autumn ensemble of transparent black velvet was set off by a smartly tailored white satin blouse, a white-trimmed purse and a pinky white bow on the snug black velvet hat perched jauntily on the back of her black curls.

She joined Mr. Bowman in the outer office, who was going with her to the studio to introduce her to that important client of the firm, Mr. Alexander Hoyt.

Even in her trepidation, she had to smile a little to herself when she anticipated that formal meeting with the man whom she had known as "dad" all her life. It might not be quite fair of her to surprise him like this, but she thought she deserved the right to make of it an important event. The circumstances had warranted it, she believed.

Mr. Bowman's car was waiting at the curb to whisk them away with a sense of importance. It had been a long time since Camilla had ridden behind a liveried chauffeur. She would never have supposed that last time, that the next event would be a manifestation of her success in her beloved work, and so soon.

Arrived at the towering building on the top of which was the broadcasting station, an elevator whisked them upward and deposited them in a large, handsomely appointed reception room where a girl at the switchboard announced them. The program manager, Mr. Ritchie, appeared presently and greeted Camilla with deferent graciousness.

"You must get acquainted around here, and make yourself at home, if you are going to be one of our regular visitors," he told her pleasantly. "You will broadcast from studio A, so we'll go right in now. Mr. Hoyt has not yet arrived, but I expect him any minute."

They passed through several rooms into a spacious, high-ceilinged room, soft-carpeted, heavy velvet hangings at the high arched windows. Two concert grand pianos made little impression in the room's size, and the large, handsomely appointed organ, including a little old-fashioned organ; a few chairs.

A half dozen microphones were suspended from the ceiling. Camilla had been there before, to try out her voice; at that she had been surprised that the "mikes" were not like those she saw erected before public speakers outside the studio. They were long, black tube-like cylinders with a small porous curtain pendant into which one spoke directly. She had learned then that papers rustled or slipped together caused "lightning" over the air, and various other facts concerning the marvel of radio broadcasting.

They had just been seated when a studio attendant ushered in Mr. Hoyt. Even before he crossed the room to them, he recognized Camilla and his reserved smile of greeting was puzzled.

"Hello, Camilla. I didn't expect to see you here. Did you come to watch the broadcasting?"

Mr. Ritchie looked from one to the other, as puzzled as was Alexander Hoyt.

"You know Mrs. Anson, Mr. Hoyt? She is here to do the broadcasting. She is your very capable advertising artist, the creator of the Tiny Tots." Camilla's smile appealed to her foster father for all that she could not express in words her forgiveness for this secrecy and the importance of her responsibility to his venture.

"Why, of course, I know Mrs. Anson—my Camilla—can it be possible?" He was speechless, but that twinkle of pleasure that she remembered so well gleamed in his eyes before a suspicious mistiness clouded them. He took her hand quietly. "My heartiest congratulations, Camilla," was all he said, but to Camilla it

was like an oration of commendation, knowing the man as she did.

There were a few moments of comment and explanation and then the room began to stir with other arrivals, people coming and going, orchestra instruments being tuned, an atmosphere of waiting expectation. A huge clock on one side of the room, with a long, impatient second hand, measured off the passing time rapidly.

Lights flashed on a signal board. Finally, double sound-proof doors were closed, everyone was in his place to avoid the least fractional second of delay. Camilla thrilled to this new experience of being a part of that vast organization of education and amusement that flooded the air all over the world from these perfectly regulated units.

A red light flashed above the letter A on the signal board, and the voice of the station announcer began his introduction to the Wheatheart Cereal program. The orchestra followed instantly with a key selection. Mr. Ritchie introduced Mr. Hoyt briefly and he, in turn, presented Camilla. His audience and the occupants of that room could have been no more astonished than was Camilla herself when he said:

"Boys and girls, I am not only going to introduce to you the creator of the Tiny Tots, but I am going to pass on to you a lovely surprise which I had just a few minutes ago when I met Miss Camilla Anson. You have not known who first thought of the Tiny Tots and neither have I before this afternoon. Imagine my surprise to discover that it was my own little girl, grown up and working for me and for you, and all the time I did not know it. I know that she was working somewhere with art work, but I never knew until now that she was bringing Tiny Tots to life for your entertainment and happiness. I wish I might tell all of you what a splendid and beautiful little girl she is, for I know you would love her as much as I do. And now, I am going to let her tell you the first adventure of her little people over the radio. Miss Anson—"

Camilla never knew quite how she managed to control her voice after that comment. Fortunately, she had written out her story so that she could refer to it in emergency, which gave her a sense of security, and she managed to get through the ordeal somehow. Her voice gained confidence and clarity as she continued, and her story proved to be timely to the second for the eighteen minutes allotted her. She returned to her chair with a feeling of weak exhaustion, wondering if she had been a failure. But Mr. Ritchie smiled reassuringly and whispered, "Splendid!"

**SUMMER COMPLAINT Relieved!**

A mother in Thompsons, Ontario, writes: "In the summer months the kids in our family get sick with the summer complaint, but now we get them through the summer safely with Baby's Own Tablets. They are something like a magic wand. They quickly relieve the stomach and the little ones are happy again. Baby's Own Tablets are the only tablets that can be given to children. They are safe everywhere. Buy a box today."

**Baby's Own Tablets**

## DIXIE

### PLUG SMOKING TOBACCO

For real economy and enjoyment, smoke plug tobacco. The tobacco stays fresher, because you cut each pipeful as you need it... coarse or flaky, to suit yourself. And, it lasts longer in your pipe!

did, under cover of the music which followed.

Finally, then, it was over and Camilla passed through the opened doors, feeling as if she had been on a strange journey to another world. Mr. Hoyt took her arm affectionately.

"I can't tell you how proud I am, Camilla, nor how much I appreciate what you have done for me. Your mother will be immensely pleased, too. Can't you come out to dinner with us to-night? We haven't seen much of you these days. And, no wonder," he added with a shy twisted smile.

"Sorry, but I can't to-night, dad. You know, Peter leaves day after tomorrow for New York to sail on the sixteenth. But I shall be seeing you more often when he is gone, I promise. I've been terribly busy and I don't look like I am going to be less busy very soon. I do want to talk with you about—everything, and I'd like to have some co-operation on some of my ideas hereafter. It's been—" She stopped a little breathlessly, "rather a struggle, to make it go all alone."

"You are wonderful," he said simply, "and we are proud of Peter, also. So glad that he won the scholarship, but I wonder what you are going to do without him."

"Just work—and wait for him," she laughed.

A boy interrupted them. "Telephone for Miss Anson, please. Over here, he directed."

Camilla wondered who could be calling her there, excused herself from the group.

"Dear, you were marvelous!" Peter's voice replied to her hesitant, "Hello."

"Who in the world but you, darling, would think of calling me before I left here?" she exclaimed joyously.

"Thought I better catch you while I could. How do I know where you may be going next? A famous wife is the most elusive thing I can imagine, and I'm going to have to spend myself up to keep up with her."

"Honestly, Peter, did my voice sound all right?"

"Perfect—wonderful. I'll bet your fan mail day after tomorrow snows you under."

She laughed happily. "Thanks, dearest, I'll meet you in an hour, then, as I promised."

"I called because I was afraid you would forget."

"As if I could!" Camilla reproached him fondly.

(To Be Continued)

### Largest Motor Coach

Travels From Baghdad To Damascus In One Day

The largest motor coach in the world has just been made and put on the road. It is well over 70 feet long, and has been designed for service on the road from Baghdad to Damascus, which passes through the Syrian desert. Formerly the journey by road took about 21 days. The new coach, it is said, will reduce this to as many hours. The vehicle, the motive power of which is a 385 horsepower Diesel engine, provides accommodation for 28 passengers, and carries a crew of 10. It has two storyboards, the sleeping bunks being "upstairs."

### Little Helps For This Week

"The shadow of a great rock in a weary land." Isaiah 32:2.

"In returning and rest shall ye be saved; in quietness and confidence shall be your strength." Isaiah 30:15.

O shadow in a sultry land We gather to Thy breast, Whose love enfolding like the night, Brings quietude and rest, Glimpses of the fairer life to be, In foretaste here possessed.

Strive to see God in all things and acquiesce in His will with absolute submission. Do everything for God, uniting yourself with Him by a mere upward glance, or by the overflowing of your heart toward Him. Never be in a hurry, do everything quietly and in a calm spirit. Do not lose your inward peace for anything whatsoever, even if your whole world seems to be upset. Commend all to God, and whatever happens abide steadfast in a determination to cling closely to Him, trusting to His eternal love for you, and if you find you have wandered forth from this shelter recall your heart quietly and simply. Do not smother yourself with a host of cares, wishes or longings under any pretext.—Francis De Sales.

### Safety Minded

Organization For The Prevention Of Accidents In Industry

The fact that there is an organization set up and operated solely for the prevention of accidents in industry should be sufficient to emphasize in the public mind the importance of the work it has undertaken, and should encourage all individuals to co-operate in achieving the aims to which it aspires. When one realizes, as has been pointed out, that at least 85 per cent. of all industrial accidents are preventable, it is easy to conclude that the painful toll could be quickly and drastically reduced if the people as a whole were to become safety-minded.—St. John Telegraph-Journal.

## DENICOTEA

### CIGARETTE HOLDER

DENICOTEA Cigarette Holder absorbs the nicotine, pyridine, ammonia and resinous and fatty substances found in tobacco smoke.

Complete holder with refill — \$1.00 postpaid, or from your Druggist or Tobacconist. Dealers wanted everywhere.

## LOCAL & GENERAL

Mr. W. H. B. Sharp installed new Holmes sound equipment in one of the Edmonton theatres this week.

Rev. MacGregor Grant of St. Paul's United Church, Brandon, was a visitor with Mrs. and Mrs. Russell Berselt during the week.

Miss Edith Webster has just returned from the School of Drama at Barf where she was successful in getting in the production of "La Fiesta," which was produced at the Barf Little Theatre.

Mrs. W. H. B. Sharp, Gray Sharp, Mr. and Mrs. Gilbert of Calgary and Miss Gertrude Clayton of Edmonton returned from a visit with Mrs. Sharp's daughter, Mrs. Austin Alexander of Vancouver. The trip was made by car via Spokane and Seattle.

## Big Improvement in Hog Quality

Hog producers of the province are making remarkable progress in improvement of the quality of hogs. Figures available for this year to date show a striking increase in the number of hogs marketed in the two top grades, selects and bacon. Up to August 16, total hogs marketed in the plants and stockyards of the province were 539,000 compared with 575,000 in the same period last year. Of the total this year to date, nearly 11 per cent. have graded selects, compared with only 7.28 per cent. in the same period last year, while 35.31 per cent. have graded bacon compared with 31.59 last year. The percentage of butchers this year so far has been 40.91 per cent. compared with 47.27 per cent. last year. The figures show that Alberta is now marketing over 46 per cent. of its hogs in the two top grades. When the fall marketings start it is expected an even better percentage of bacons and selects will be shown. Last year the percentage in the two top grades was about 42. This year should bring the percentage close to 50, which is considered a remarkable showing. The improvement is largely due to the efforts made by producers to improve their stock following the intensive educational campaign carried out during the last year jointly by the provincial and federal departments of agriculture with the co-operation of railways, packers and other interests.

## BERGEN—NICHE VALLEY

Clara Lutkehaus-Miner and husband have a fine son so we hear.

The new Eldwood school is completed and being painted. Miss Irene McConnell will teach the school for her fifth year.

The crops here are better than those farther east. Ross Ellis has a field of oats 51 $\frac{1}{2}$  ft. tall all over the field. These are the best to be seen in the district.

Rev. Oscar Snyder was unfortunate in falling from his horse while leading another Sunday last but one. He was put to bed and then taken into Didsbury. We sincerely hope the accident was not serious.

Mrs. Ira Gamble has gone to B.C. for a three weeks' visit. She has her mother, two sisters and a brother living in Milner and Vancouver. She expects to have a very pleasant trip.

Good quality writing pads of first class paper.—100 sheets per pad 25c.—Pioneer Office.

Mrs. H. C. Rennie and children returned Monday from their holiday at the coast.

Miss Parrott, matron at the Hospital, left last weekend for a vacation at the coast.

Meers E. G. Ranton, Bill Ranton, Frank Raymond and Tom Roys spent the holiday in Calgary.

Mr. and Mrs. C. R. Marcelus of Calgary spent the holiday with Mr. and Mrs. C. E. Marcelus.

Mayor H. W. Chambers returned Monday from his holiday spent at Sacramento, Cal.

Mr. Nick Nowak spent the week-end visiting at Calgary and High River.

Miss Winnie Moyle of Toronto is spending the present week at the home of her father Mr. Fred Moyle.

Mr. and Mrs. Archie Boyce of Carstairs were Didsbury visitors on Sunday.

Mr. and Mrs. W. J. Hillyard left Sunday for a week's holiday with friends at Wainwright.

Mr. and Mrs. Jas. Cathiness and family were Calgary visitors on Saturday.

Mr. and Mrs. C. S. Mortimer and family spent the weekend and holiday at Sinclair Canyon.

Mr. and Mrs. Ben Robinson and son of Morrinville are spending a week of their vacation at the home of Mrs. G. B. Saxsmith.

Miss Mary Dick of Nanton is relieving at the Post Office in the absence of Mr. Morgan and Miss Laura Smith.

Miss Edith Mitchell of Calgary spent the weekend visiting with her parents, Rev and Mrs. A. J. Mitchell.

Mrs. A. C. Fisher advises us that there is no change in the condition of her sister, Mrs. Walter Dawn of Ghost Pine, who is lying seriously ill in the Calgary General Hospital.

Mrs. E. V. Woodlock and children returned home on Monday after a pleasant two months spent at the home of Mrs. Woodlock's parents at Tacoma, Wash.

Meers J. A. Russell and George McKendrick-Grievess were in Calgary on Monday where they met Mrs. Russell and Miss Jean on their return from the coast.

Mr. and Mrs. Sam Franklin, who were holidaying at Portland, Ore., returned last weekend. While at Newport they visited Mr. J. E. Foran, an old friend of the Cremona district.

Rev. A. E. Hares of Edmonton and former minister of the United Church here, was a Monday visitor with Dr. and Mrs. Clarke. The latter with their guest were Calgary visitors Tuesday.

Mr. and Mrs. J. H. Fleury had as their guests over the weekend Mr. Fleury's nephews, Roy and James Malgoux and two friends, Joe Armstrong and Bill Redfern of Calgary.

Mr. and Mrs. W. J. Fulkorth and son Rex, Mr. and Mrs. Walter Fulkorth and son Baldie, and Mrs. L. B. Fulkorth, who have been holding a number of the Southern States, returned to their homes here on Saturday.

Joan Coates started Tuesday to the same school her father attended, riding the same pony her father rode the last day he went to this school thirteen years ago. Mr. Billie Coates is the first one of the children, so far as is known, to have his child attend this school.

Rev. Elliott H. Birdall has completed his summer course at the University at Chicago. After spending the week with his friend Orlando Hehn at Clarno, Wisconsin, he will attend the Student's Christian Movement Conference near Toronto from September 14th to 20th before taking up his course at the Theological Seminary, New York City.
